

STEEL VALLEY ELEMENTARY SCHOOL

Munhall, Pennsylvania · Steel Valley School District

700	2026	2 → 1	Pilot
K–5 learners	Opened August 2026	Schools united	Tested first in 2025

THE VISION

Steel Valley replaced two elementary schools, each more than 100 years old, with one new building that unites every K–5 student under one roof for the first time. The district wanted classrooms where desks and seats move and learning connects to the outdoors.

DESIGN HIGHLIGHTS

- Mobile desks and chairs in every classroom
- Learning commons with collaboration zones
- Hallway breakout spaces for small groups
- Flexible seating chosen through 2025 pilots
- Spaces tied to the community's steel heritage

KAY-TWELVE AS LEARNING SPACE INTEGRATOR

We piloted classrooms in the old buildings first, so teachers could test the furniture before the new school opened.

01 Pilot
2025 pilot classrooms let teachers try options first

02 Listen
Teacher feedback from the pilots shaped every selection

03 Plan
Planned classrooms, commons and breakouts with DRAW Collective

04 Install
Installed for the August 2026 opening

THE RESULT

Every Steel Valley K–5 learner now shares one building designed around how they learn.
